

Drawing Workshop II (Taller de Dibujo II), an interdisciplinary teaching in UAH

Alberto Lastra and Manuel de Miguel

Universidad de Alcalá,
Alcalá de Henares, Madrid (Spain)

ABSTRACT

The main aim of this talk is to provide an overview of the subject “Taller de Dibujo II” (Drawing Workshop II), located at the second course of the Degree in Fundamentals of Architecture and Urbanism, at the University of Alcalá (UAH).

This subject is taught by teachers of the area of Graphic Design in Architecture and Applied Mathematics. Its final purpose is to provide an integrated teaching of different architectural objects from different points of view. Mathematical theory and techniques are applied to the study of the geometry of concrete buildings by means of the mathematical software.

Several examples considered in the past eight academic courses are shown, providing a general insight.
